Table of Contents

Preface ix
▪ About *Combinatorica* ▪ What's Between the Covers ▪ Why *Mathematica*? ▪ Acknowledgments ▪ Caveat ▪ Dedication

Chapter 1. *Combinatorica*: An Explorer's Guide

1.1 Combinatorial Objects: Permutations, Subsets, Partitions 3
▪ Permutations and Subsets ▪ Partitions, Compositions, and Young Tableaux

1.2 Graph Theory and Algorithms 10
▪ Representing Graphs ▪ Drawing Graphs ▪ Generating Graphs ▪ Properties of Graphs ▪ Algorithmic Graph Theory

1.3 *Combinatorica* Conversion Guide 32
▪ The Main Differences ▪ Functions Whose Usage Has Changed

1.4 An Overview of *Mathematica* 41
▪ The Structure of Functions ▪ Mathematical Operations ▪ List Manipulation ▪ Iteration ▪ Ten Little n-Sums ▪ Conditionals ▪ Compiling *Mathematica* Code

Chapter 2. Permutations and Combinations

2.1 Generating Permutations 55
▪ Lexicographically Ordered Permutations ▪ Ranking and Unranking Permutations ▪ Random Permutations ▪ Minimum Change Permutations

2.2 Inversions and Inversion Vectors 69
▪ Inversion Vectors ▪ Counting Inversions ▪ The Index of a Permutation ▪ Runs and Eulerian Numbers

2.3 Combinations 76
▪ Subsets via Binary Representation ▪ Gray Codes ▪ Lexicographically Ordered Subsets ▪ Generating k-Subsets ▪ Strings

2.4 Exercises 89
▪ Thought Exercises ▪ Programming Exercises ▪ Experimental Exercises

Chapter 3. Algebraic Combinatorics

3.1 The Cycle Structure of Permutations 93
▪ Odd and Even Permutations ▪ Types of Permutations ▪ Hiding Cycles ▪ Counting Cycles

3.2 Special Classes of Permutations 104
▪ Involutions ▪ Derangements

3.3 Pólya Theory 109
▪ Permutation Groups ▪ Group Action ▪ Equivalence Classes and Orbits ▪ Cycle Index of Permutation Groups ▪ Applying Pólya's Theorem

3.4 Exercises 131
▪ Thought Exercises ▪ Programming Exercises ▪ Experimental Exercises

Published online by Cambridge University Press

Chapter 4. Partitions, Compositions, and Young Tableaux

4.1 Integer Partitions 135
▪ Generating Partitions ▪ Generating Functions and Partitions ▪ Ferrers Diagrams ▪ Random Partitions

4.2 Compositions 146
▪ Random Compositions ▪ Generating Compositions

4.3 Set Partitions 149
▪ Generating Set Partitions ▪ Stirling and Bell Numbers ▪ Ranking, Unranking, and Random Set Partitions ▪ Set Partitions and Restricted Growth Functions

4.4 Young Tableaux 162
▪ Insertion and Deletion ▪ Permutations and Pairs of Tableaux ▪ Generating Young Tableaux ▪ Counting Tableaux by Shape ▪ Random Tableaux ▪ Longest Increasing Subsequences

4.5 Exercises 173
▪ Thought Exercises ▪ Programming Exercises ▪ Experimental Exercises

Chapter 5. Graph Representation

5.1 Data Structures for Graphs 179
▪ The Internal Representation ▪ Edge Lists ▪ Adjacency Lists ▪ Adjacency Matrices ▪ Incidence Matrices

5.2 Modifying Graphs 192
▪ Additions, Deletions, and Changes ▪ Setting Graph Options

5.3 Classifying Graphs 198

5.4 Displaying Graphs 200
▪ The Vertex and Edge Options ▪ Inherited Options ▪ A Hierarchy of Options ▪ Highlighting and Animation

5.5 Basic Graph Embeddings 213
▪ Circular Embeddings ▪ Ranked Embeddings ▪ Radial Embeddings ▪ Rooted Embeddings

5.6 Improving Embeddings 219
▪ Translating, Dilating, and Rotating Graphs ▪ Shaking Graphs ▪ Spring Embeddings

5.7 Storing and Editing Graphs 224

5.8 Exercises 226
▪ Thought Exercises ▪ Programming Exercises ▪ Experimental Exercises

Chapter 6. Generating Graphs

6.1 Building Graphs from Other Graphs 231
▪ Contracting Vertices ▪ Inducing and Permuting Subgraphs ▪ Unions and Intersections ▪ Sums and Differences ▪ Joins of Graphs ▪ Products of Graphs ▪ Line Graphs

6.2 Regular Structures 244
▪ Complete Graphs ▪ Circulant Graphs ▪ Complete k-Partite Graphs ▪ Cycles, Stars, and Wheels ▪ Grid Graphs ▪ Interconnection Networks

Published online by Cambridge University Press

6.3 Trees 258
▪ Labeled Trees ▪ Complete Trees

6.4 Random Graphs 262
▪ Constructing Random Graphs ▪ Realizing Degree Sequences

6.5 Relations and Functional Graphs 269
▪ Graphs from Relations ▪ Functional Graphs

6.6 Exercises 273
▪ Thought Exercises ▪ Programming Exercises ▪ Experimental Exercises

Chapter 7. Properties of Graphs

7.1 Graph Traversals 277
▪ Breadth-First Search ▪ Depth-First Search

7.2 Connectivity 283
▪ Connected Components ▪ Strong and Weak Connectivity ▪ Orienting Graphs ▪ Biconnected Components ▪ k-Connectivity ▪ Harary Graphs

7.3 Cycles in Graphs 294
▪ Acyclic Graphs ▪ Girth ▪ Eulerian Cycles ▪ Hamiltonian Cycles and Paths ▪ Traveling Salesman Tours

7.4 Graph Coloring 306
▪ Bipartite Graphs ▪ Chromatic Polynomials ▪ Finding a Vertex Coloring ▪ Edge Colorings

7.5 Cliques, Vertex Covers, and Independent Sets 316
▪ Maximum Clique ▪ Minimum Vertex Cover ▪ Maximum Independent Set

7.6 Exercises 319
▪ Thought Exercises ▪ Programming Exercises ▪ Experimental Exercises

Chapter 8. Algorithmic Graph Theory

8.1 Shortest Paths 323
▪ Single-Source Shortest Paths ▪ All-Pairs Shortest Paths ▪ Applications of All-Pairs Shortest Paths ▪ Number of Paths

8.2 Minimum Spanning Trees 335
▪ Union-Find ▪ Kruskal's Algorithm ▪ Counting Spanning Trees

8.3 Network Flow 340

8.4 Matching 343
▪ Maximal Matching ▪ Bipartite Matching ▪ Weighted Bipartite Matching and Vertex Cover ▪ Stable Marriages

8.5 Partial Orders 352
▪ Topological Sorting ▪ Transitive Closure and Reduction ▪ Hasse Diagrams ▪ Dilworth's Theorem

8.6 Graph Isomorphism 363
▪ Finding Isomorphisms ▪ Tree Isomorphism ▪ Self-Complementary Graphs

Published online by Cambridge University Press

8.7 Planar Graphs **370**
▪ Testing Planarity

8.8 Exercises **372**
▪ Thought Exercises ▪ Programming Exercises ▪ Experimental Exercises

Appendix **375**

Reference Guide **376**

Bibliography **447**

Index **459**
